DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Greenhill et al. ("Greenhill")(WO 68160)(citations to US equivalent 6,615,987).

Greenhill teaches a method for the treatment of kaolin particulate material (col. 4-6 teaching kaolin clay with various impurities of various weights) comprising:

(a) providing a dispersed aqueous suspension comprising kaolin particulate material and having a pH of at least about 7.5 (col. 3, 4, 7 teaching adjustment of pH to various levels), wherein said dispersed aqueous suspension is provided by a process comprising including at least one dispersant with the aqueous suspension of kaolin particulate material (col. 6) and further comprising blunging said dispersed aqueous suspension (Id.) and further comprising conditioning said dispersed aqueous suspension by allowing said suspension to age for a period of at least 30 minutes and by adding to said suspension at least one conditioning chemical (col. 7);

(b) selecting at least one selective flocculation polymer, wherein said at least one selective flocculation polymer has a measured anionicity ranging from about 1% to about 12% (col. 8 teaching various polymers);

(c) selectively flocculating said suspension into a first layer and a second layer by adding to said suspension said at least one selective flocculation polymer (col. 8-9); and

(d) separating said first layer from said second layer (col. 3, 8, 9 teaching claimed layer features)(See also Examples 1-4).

Response to Arguments

Applicant's arguments filed 6/5/2008 have been fully considered but they are not persuasive.

Rejections under USC 102

Regarding Applicant's argument, "the Office action does not point out where Greenhill discloses a selective flocculation polymer having 'a measured anionicity ranging from 1% to about 12%, 'manufactured by a continuous process and [having] a measured anionicity ranging from about 1% to about 12%, 'or having a 'narrow ranged of variability for measured anionicity and ... a measured anionicity ranging from about 1% to about 12%," the Examiner disagrees. The Examiner draws attention to Greenhill's teaching of 1% to 10% being suitable and therefore encompass the ranged in the claimed language (col. 8, lines 47-51).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
